

Piroz Kianersi

AI Developer (Python)

Profile

Contributing to innovative projects that have the potential to change how we use technology in our everyday lives. I'm trained as an AI Developer, with Python as my main language, and I've specialized in applied AI and development.

Besides working in tech, I bring over 20 years of experience from both media and the arts – a background that's given me a unique blend of creativity, technical skill, and business thinking.

During my years in media, I've worked on public affairs programs, children's shows, and TV news broadcasts, and I've also produced two documentary films.

Running my own art business for several years has helped me grow as a leader and entrepreneur, with hands-on experience in team management, client relations, and business development.

Strengths

Ability to analyze problems
and find effective solutions
I think critically and have
a keen eye for detail
which helps me deliver
thoughtful and precise results
I truly enjoy working in teams
and value collaboration
I believe that through shared
effort and open communi-
cation, we can grow together
and reach meaningful goals.
